

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCIENCE

FRIDAY, MAY 2, 1919

CONTENTS	
Cooperation between Zoological Laboratories and the Government Bureaus: E. W. Nelson.	409
The History of Poison Gases: Major Clar- ENCE J. WEST	413
Duty Free Supplies: Dr. Thomas B. Freas and Dr. W. L. Estabrooke	417
Scientific Events:— The Use of Reinforced Concrete in Shipbuilding; Education and Science in the British Civil Service Estimates; Appointments at Harvard University	419
Scientific Notes and News	421
University and Educational News	422
Discussion and Correspondence:— Erroneous Generic Determinations of Bees: DR. CHARLES ROBERTSON. Geomorphology: C. A. COTTON. "A Wave of Life:" G. B. CLAYCOMB	422
Quotations:— The Physiology of a Working Day	424
Scientific Books:— Washburn on Injurious Insects and Useful Birds: W. E. Britton	425
Anthropological Research: Drs. Franz Boas, ALES Hrdlicka, Alfred M. Tozzer	426
Special Articles:— Egg-weight as a Criterion of Numerical Production in the Domestic Fowl: Dr. PHILIP HADLEY	427
Societies and Academies:— The National Academy of Sciences	429

MSS. intended for publication and books, etc., intended for review should be sent to The Editor of Science, Garrison-on-Hudson, N. Y.

COOPERATION BETWEEN ZOOLOG-ICAL LABORATORIES AND THE GOVERNMENT BUREAUS

THE establishment of the Council of National Research and the utilization of a host of other scientific workers from universities and colleges in all sections of the country as parts of the war machinery of the government has for a considerable period and on a large scale brought the college scientists in close contact with the scientists of the governmental bureaus in Washington. This has, I believe, brought about a mutual feeling of friendship and cordial understanding far beyond anything hitherto existing.

Now that the extraordinarily varied scientific work being regularly conducted in Washington under governmental auspices has become more widely known to college workers, the way is open to make this information useful. For instance, would it not be practicable for the head of each college biological or zoological laboratory to make a point year by year to secure first-hand information as to the many lines of governmental work in progress in his branch of science, both as to research problems and as to the application of scientific knowledge to economic work? Probably no field of research offers the student a greater number of subjects of general value to the community.

Possibly the college zoological laboratories might obtain funds, perhaps as fellowships or in other form, with which the more promising students could be given opportunity to visit government laboratories in Washington and elsewhere and become acquainted with government workers in the lines in which they are interested. In this way they could get definite information as to methods of research, the practical handling of various problems and the technique of the leading government
